

ICStripBoard 0.65mm

A Universal IC Strip Break Out Board designed on 0.8mm FR4 Tg 140C with a Nickel/Gold finish. It is 25mm x 100mm in size. It has been designed to work with the majority of In-line IC's with a pitch or space between pads of 0.65mm. This board has 308 pads for IC pins, each one has the measurements 5mm x 0.3mm. These are divided into two 154 long strips which can accommodate a large variety of ICs for soldering and experimentation. It has been designed so that it can be cut to size of the IC you want to use allowing you to experiment with multiple IC's.

Specifications:

Pitch: 0.65mm

Number Pads: 300

Hole diameter: 0.5mm

Track width: 0.127mm

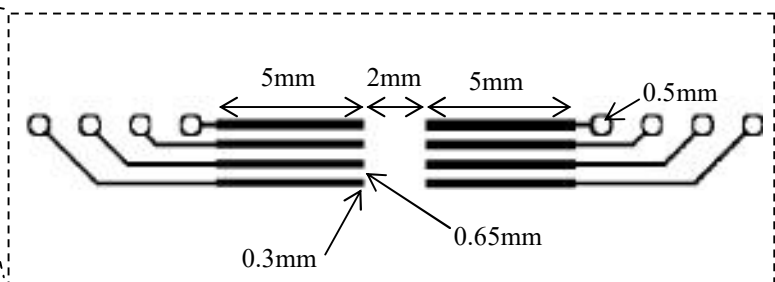

Board Length: 100mm

Board Width: 25mm

Board Thickness: 0.8mm

Board Finish: Nickel/Gold

Suitable Wire: AWG25/SWG26 (Cross sectional area <math><0.19\text{mm}^2</math>)
