

ICStripBoard 0.95mm

A Universal IC Strip Break Out Board designed on 0.8mm FR4 Tg 140C with a Nickel/Gold finish. It is 20mm x 100mm in size. It has been designed to work with the majority of In-line IC's with a pitch or space between pads of 0.95mm. This board has 208 pads for IC pins, each one has the measurements 5mm x 0.4mm. These are divided into two 104 long strips which can accommodate a large variety of ICs for soldering and experimentation. It has been designed so that it can be cut to size of the IC you want to use allowing you to experiment with multiple IC's.

Specifications:

Pitch: 0.95mm
Number Pads: 208
Hole diameter: 0.75mm
Track width: 0.127mm
Board Length: 100mm
Board Width: 25mm
Board Thickness: 0.8mm
Board Finish: Nickel/Gold
Suitable Wire: AWG21/SWG22 (Cross sectional area <math><0.44\text{mm}^2</math>)
